

BF272-Modular Design Blade Fuse Blocks

CATNO: SZ2011

Modular Design Blade (ATP/ATO/ATC) Fuse Blocks - Basic Modules

The BF27x series are compact and solid blade fuse blocks designed for 24-hour circuits. The fuse blocks come with blown fuse indication LEDs, clear cover with recessed areas for label stickers and are available in two versions with different terminals (screw terminals).

Two Modules for all

YIS Marine exclusive modular design – two basic modules can be combined into 4 popular fuse blocks (and more depending on specific needs). The assembly is very simple and can be done by consumers alone (instruction manual included). This not only gives consumers flexibility to expand their current fuse block, but also allows retailers to save precious shelf space in the store.

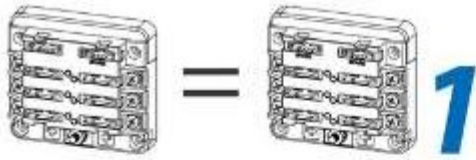

6P Fuse Block

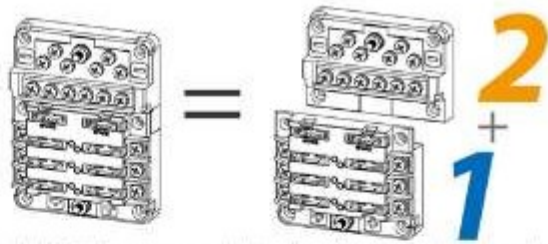

12P Negative Bus Bar

BF271 6P Fuse Block

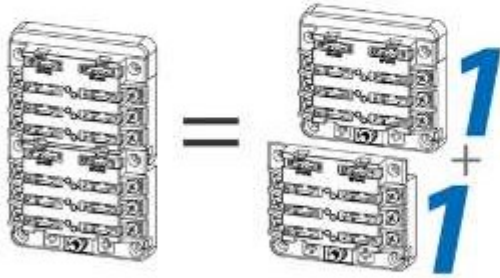

BF273 6P Fuse Block with Negative Bus Bar
